An international symposium to celebrate the 100th anniversary of the famous talk that Giacomo Ciamician delivered to the 8th International Congress of Applied Chemistry in New York

Saturday 13 October 2012
Aula Magna, Dipartimento di Chimica “Giacomo Ciamician”
Università di Bologna

SCIENTIFIC PROGRAM
The symposium will focus on various aspects and applications of photochemistry that are highly topical in our days, some of which – e.g. solar energy conversion, photoresponsive materials – were already discussed by Ciamician a century ago. The program will comprise plenary lectures from international experts:

Vincenzo BALZANI  ♦  Luisa DE COLA  ♦  Ben FERINGA
René JANSSEN  ♦  Devens GUST  ♦  Giulio JORI  ♦  Franco SCANDOLA

LOCATION AND REGISTRATION
The symposium will be held at the University of Bologna, in the Department of Chemistry named after Giacomo Ciamician, via Selmi 2. Registration information, scientific program, and book of abstracts are available online at www.photonanolab.it.
For further information, please write to margherita.venturi@unibo.it.

ORGANIZING COMMITTEE
Margherita Venturi (Chairperson), Nicola Armaroli, Giacomo Bergamini, Paola Ceroni, Alberto Credi, Marco Montalti, Luca Prodi, Enrico Rampazzo, Serena Silvi, Nelsi Zaccheroni
